September 21, 2026

Dear Hiring Manager,

I am writing to express my interest in System / Infrastructure Engineering opportunities where I can apply my hands-on experience in enterprise Linux administration, Oracle systems, and virtualization. As a Junior System Engineer at Express System Limited, I support mission-critical SPARC, X-Series, Exadata, and Private Cloud Appliance (PCA) environments for banking and telecom clients across a 24x7 on-call rotation, with a track record of reliable uptime and structured incident handling.

In this role, I have administered Oracle Solaris environments on SPARC infrastructure, managed ZFS storage pools with snapshot and replication strategies, and led OS deployment and patch configuration for an Oracle Database Appliance X11 high-availability cluster at NRB Bank. My technical foundation spans storage (LVM, RAID, Multipath), networking (bonding, VLAN, DNS), and security hardening (SELinux, SSH, OpenSSL), reinforced by certifications including the Red Hat Certified System Administrator (RHCSA), Oracle Cloud Infrastructure Certified Foundations Associate, and MySQL Implementation Certified Associate.

I take pride in clear escalation, careful log analysis, and thorough documentation under pressure, and I am eager to bring that same rigor to a team that values operational excellence. I would welcome the opportunity to discuss how my background in enterprise systems support can contribute to your organization's infrastructure goals.

Thank you for your time and consideration. I look forward to the possibility of speaking further.

Sincerely,

Md. Al Amin Shakil
